Translation: Practices and Challenges

DESCRIPTION
This course introduces the common practices in the field of translation and discusses the challenges the discipline faces in the present age of information technology.

COURSE OVERVIEW
This course is about the basics of translation. Through exploration of everyday life examples, students will be equipped with general ideas about how to approach a text for translation. There will also be discussions on the role of information technology in translation (note, however, that this course offers no training in the use of IT software for translation purposes).

LEARNING OUTCOMES
Expected learning outcomes

1. Students are expected to be able to gain a basic understanding of what translation is about and various kinds of translation (K).
2. Students should have a general idea of how to differentiate a good translation from a poor one (no advanced-level theories on translation criticism will be imparted though) (K).
3. Students should have an understanding of the role of information technology in translation, and be aware of the different opinions regarding using IT in translation (K).
4. Students should be able to apply their knowledge to translation practices (S).

Implication for learning activities
Through the take-home assignments and in-class exercises, students should be able to see how...
much they have understood regarding the major topics discussed. It is not intended that students will become very competent translators after just a few months, but having participated in the in-class activities and done all the required homework they should be in a better position to understand translation as an academic discipline and rectify any misconceptions they might have about the nature of translation.

**Implication for assessment**

Students will be assessed via several take-home tasks/assignments and a final test. They will have ample time to work on their homework, which enables them to apply the skills that they have learnt. They will also be graded upon an in-class participation score. These several components ensure that all students have the chance to demonstrate improvement over time instead of having their course grade dependent wholly on one final examination.

**LIST OF TOPICS**

1. Everyday life translations – examples and discussions
2. The fuzzy boundary between translations and non-translations
